👤 Profile

A passionate ethical hacker eager to excel in Cybersecurity, DevOps, Cloud Computing and Machine Learning. I have a deep interest in Computer Networks, Security, and Red Teaming, with a focus on integrating these with DevOps practices to enhance security and efficiency. My curiosity drives continuous learning and self-improvement, enabling me to contribute effectively to safeguarding cyberspace while collaborating to share knowledge and achieve mutual growth.

📁 Experience

Assistant System Engineer

Tata Consultancy Services (TCS)

09/2024 – present
Chennai, India

During my training period, I studied core technologies including Java, Java Web, SQL, PL/SQL, HTML, CSS, JavaScript, Spring Boot, and Angular, gaining a strong foundation in full-stack development. I also worked on a project that involved building a web application using Spring Boot for back-end development and Angular for creating a responsive front-end application.

DevSecOps Intern

DigiAlert

08/2023 – 10/2023
Chennai, India

As a DevSecOps Intern at DigiAlert, I focused on integrating DevOps with cybersecurity, working on projects to streamline deployments and enhance security measures. I used Terraform for automation, optimized CI/CD workflows using Jenkins, and utilized AWS and Google Cloud for project execution while monitoring vulnerabilities with GuardDuty and WAF.

Machine Learning Intern - Inmoovidu

I gained practical expertise by developing Python-based machine-learning projects.

2020
Remote

🧠 Skills

Technical Skills: Python | Web (HTML, CSS, JS) | Java | Java Web | Spring Boot | Angular | SQL | Active Directory | Vulnerability Analysis | Pentesting - Web | System Administration | Linux Shell Scripting

Tools: Cloud- Google Cloud, AWS & Azure | Linux | Git | Terraform (IaC) | Jenkins | Docker | Virtualization - Oracle VirtualBox & VMWare | API - Postman & Swagger | SIEM (Splunk, Grafana, QRadar) | VAPT (Synk, Burp Suite, WireShark, ZAP, MetaSploit)

Soft Skills: Wireframing | Communication | Rapid Prototyping

📜 Certifications

Red Hat Certified System Administrator (RHCSA)

Certification ID: 230-219-636

Red Hat Certified Engineer (RHCE)

Certification ID: 230-219-636

Google Cloud Associate Cloud Engineer

Certification ID: cbbdd35302064fd99ba20debed5ad185

AWS Certified Cloud Practitioner

Certification ID: 3c01450cacb141c5a93dde387c44e6f5

Microsoft Certified: Azure AI Fundamentals

Certification ID: 76C1F52B5A5D9A76

GitHub Certifications (Foundations, Copilot, Actions)

GitHub

Security Certified Network Specilaist (SCNS)

ICSI, UK

IBM Cybersecurity Analyst

IBM - Coursera

Foundations Of Operationazing MITRE ATT&CK

AttackIQ

PostgreSQL

Udemy

PWC - Launchpad

6 Months Training Program (Mar 2023 - Sep 2023)
IT Fundamentals, RDBMS, Python, Data Engineering

Advent of Cyber 2022 & 2023

TryHackMe

MongoDB Basics - ICT Academy

MongoDB

Containerize Applications with Docker

LinkedIn Learning

Education

Sathyabama Institute Of Science & Technology

BE CSE- Artificial Intelligence

9.25/10 (CGPA)

2020 - 2024

Chennai, India

Sri Ram Dayal Khemka Vivekananda Vidyalaya Junior College

10th Grade - 78%

12th Grade - 67.8%

Chennai, India

Projects

Online Grocery Store

Developed a dynamic Online Grocery Store platform during TCS training, using **Spring Boot** for the backend and **Angular** for the frontend. The platform allows users to browse products, manage their cart, place orders and proceed to checkout. Additionally, an admin functionality was implemented for managing products, viewing order summaries and handling user management.

Raspberry Pi-Based Encrypted Cloud Storage Gateway

Developed an encrypted cloud storage gateway using **Raspberry Pi** to securely store and transfer files. Utilized **GnuPG** for file encryption, ensuring data confidentiality before upload to the cloud. The system integrates seamless file encryption and decryption, offering an efficient and secure solution for cloud-based storage.

Terraform-powered AWS Cloud Automation Project

Automated the deployment and management of **EC2 instances** and associated resources using **AWS**. The project involved scheduling EC2 instance operations, configuring **VPC networks**, setting up **NAT Gateways**, and managing various AWS resources for efficient infrastructure provisioning and cost optimization.

AWS GuardDuty & WAF Automation to Block Suspicious IP Addresses

Developed an **AWS Lambda** function to automatically send **GuardDuty** findings to **AWS WAF** for enhanced security monitoring and response. The integration enables real-time protection against threats by dynamically blocking malicious requests based on GuardDuty findings.

Packet Sniffing

Developed a packet sniffing tool using **Python** and the **Scapy** library to capture and analyze network traffic. It monitors communication, identifies security risks, and aids in troubleshooting by examining raw data packets.

CI/CD Pipeline

Developed a fully automated **CI/CD** pipeline to streamline the software development lifecycle using **Jenkins**, **Puppet**, **AWS CodeDeploy**, and **AWS Pipelines**. The pipeline automates the integration, testing, and deployment of applications, ensuring faster and more reliable delivery.

Keylogger

Developed a keylogger using **Python** with the **Pynput** library for capturing and analyzing keyboard input. The tool is designed for security research and monitoring purposes, enabling the detection of unauthorized keystrokes in a controlled environment.

Face Mask Detection (ML)

Developed a Face Mask Detection system using **Machine Learning** during an internship at **Inmoovidu**. The project uses **Computer Vision** techniques to identify whether people are wearing face masks or not, helping enhance safety measures in public spaces during the COVID-19 pandemic.

Spotify Clone & Instagram Clone (Figma)

Creating a **wireframe** and designing the UI of the application using **Figma**

Interests

CTF (Capture The Flag) – I love playing jeopardy style CTFs. I have participated in various events and worked on various tasks in TryHackMe and PicoCTF, to improve my skills on various dimensions of Information Security.

Linux – I am a beginner at using Linux, but I would like to explore more about it. I used to try all kinds of distros in my VirtualBox and explore its features, UI, and experience. I often use Parrot and Kali Linux to practice with commands and available tools.

Design – I like to create and explore various UI designs. I replicate a design by getting ideas from online.

Activities and Leadership

Google Developer Students Club (GDSC) - Sathyabama

President (SDC) (2023 - 2024)

Design Lead (2022 - 2023)

Technical Team Member (2020 - 2022)
