ABOUT ME

Motivated and detail-oriented tech enthusiast with a solid foundation in programming and data handling. I enjoy writing efficient SQL queries, building logical solutions in Python, and working with core programming languages like C, Java, and JavaScript. I'm passionate about solving real-world problems through code and constantly learning new technologies. I'm comfortable working with both backend logic and basic frontend scripting, which makes me a versatile contributor in development and analytics projects. I'm eager to be part of dynamic teams and grow in a challenging tech environment.

EDUCATION

2023 - 2027

SRM Institute of Science & Technology

BTech CSE- Big Data Analytics

CGPA - 8.35 / 10

2020-2021

Vellammal Mat. High School

Completed at Vellammal Matriculation High School with a grade percentage of 86%.

2022-2023

R.M.K Mat. High School

Completed at R.M.K. Matriculation High School with a grade percentage of 78%.

PROJECTS

Restaurant Management System

Developed the backend of a restaurant management system using Flask and SQLite. Key features include user authentication, menu and order management, customer handling, and admin-level analytics. Built and tested RESTful APIs with Postman to ensure smooth integration and system performance.

Bus Ticket Management System

Designed and developed a Java-based desktop application for bus ticket booking and route management. The system offers a user-friendly interface for passengers to view seat availability and make reservations, along with basic administrative tools for managing schedules and routes.

Movie Ticket Booking System

A Java-based movie ticket booking system with a Swing GUI and MySQL backend, allowing users to view showtimes, select seats, and book tickets. Utilized JDBC, OOP, and exception handling for smooth and reliable operation.

SKILLS

Technical Skills • SQL • Python • C (Java/Js)

Soft Skills • Communication • Analytical Thinking • Attention to Detail

INTERESTS

UI/UX Design (Entry-Level)

Currently exploring the core principles of UI/UX design with a focus on user-centered interfaces and intuitive experiences. I enjoy experimenting with wireframes, layout compositions, and visual hierarchies to understand how design choices impact usability. I'm learning tools like Figma and Canva to create low- and mid-fidelity prototypes, while also studying concepts such as accessibility, color theory, and responsive design. I regularly seek design inspiration and aim to improve user interaction through thoughtful design decisions.
