Profile

Enthusiastic and self-driven Computer Science undergraduate specializing in Big Data Analytics, with a strong foundation in Python, web technologies, and Java. I enjoy building real-world projects, especially in backend development and frontend design. My interests span across cybersecurity, UI/UX design, and software development. I've worked on projects using Flask, Java Swing, and responsive web design, while continuously upskilling through certifications and hands-on practice. Known for being a curious learner, effective communicator, and a team player with a passion for creating user-focused digital solutions.

Education

9.70/10 (CGPA) , BTech CSE- Big Data Analytics, SRM Institute of Science & Technology	2023 – 2027 Chennai, India
10th Grade - 81.4% , Sri Ram Dayal Khemka Vivekananda Vidyalaya Junior College	Chennai, India
12th Grade - 75.2% , Maharishi Vidya Mandir	Chennai, India

Skills

Technical Skills

- Python | Web (HTML, CSS, JS) |
- Basic Java | SQL

Soft Skills

- Communication | RapidPrototyping | Problem-Solving | Adaptability | Time Management | Teamwork | Creativity

Tools

Git | Excel

Languages

English

Tamil
Native

Malayalam

Interests

UI Development (Entry-Level)

Actively exploring the fundamentals of frontend web development with a focus on HTML, CSS, and JavaScript. I enjoy building simple yet effective web pages to understand concepts such as layout structure, styling, and interactivity. I frequently experiment with different UI design ideas and work on improving user experience through responsive design. Tools like Visual Studio Code and platforms such as CodePen and Replit help me practice and enhance my skills continuously.

Design

I like to create and explore various UI designs. I replicate a design by getting ideas from online.

Cybersecurity

I enjoy exploring various aspects of cybersecurity and practice identifying vulnerabilities through safe and ethical methods.

Projects

Restaurant Management System

Developed the backend of a restaurant management system using Flask and SQLite. Implemented features such as user authentication, menu management, order processing, customer management, and admin analytics. Designed and tested RESTful APIs using Postman to ensure seamless integration and performance.

Bus Ticket Management System

A Java-based desktop application that simplifies the process of bus seat booking and route management. The system features a user-friendly GUI for passengers to select routes, view seat availability, and reserve seats. It also includes basic administrative functionalities for managing schedules and routes.

Perfume Website (Frontend Design)

Created a visually appealing perfume product website using HTML and CSS. Focused on layout design, product showcasing, and responsive styling to enhance user experience. Implemented modern CSS features such as Flexbox, grid layouts, hover effects, and smooth transitions to achieve a clean and elegant look across different screen sizes.

VOLUNTEERING

ADW Thirumangalam Government School

Chennai, India

- Contributed to enhancing educational access through smart learning methods
- Encouraged critical thinking by guiding students to explore concepts through “why”-based questioning

Certifications

Python
Udemy

Introduction to Cybersecurity
Cisco Networking Academy

Advent of Cyber 2023 & 2024
TryHackMe
